

Non Indexed Search on the DeSoto County Land Records Search Website (Acclaim)
The Land Records Website is <https://landrecords.desotocountymys.gov/acclaimwebs>

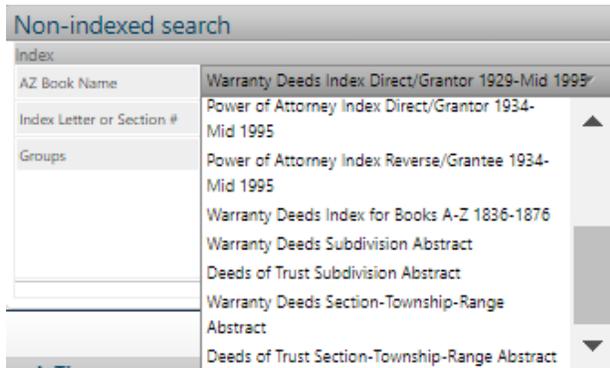

The Non-Indexed button is to the Right of the Official Search tab in the tool bar.

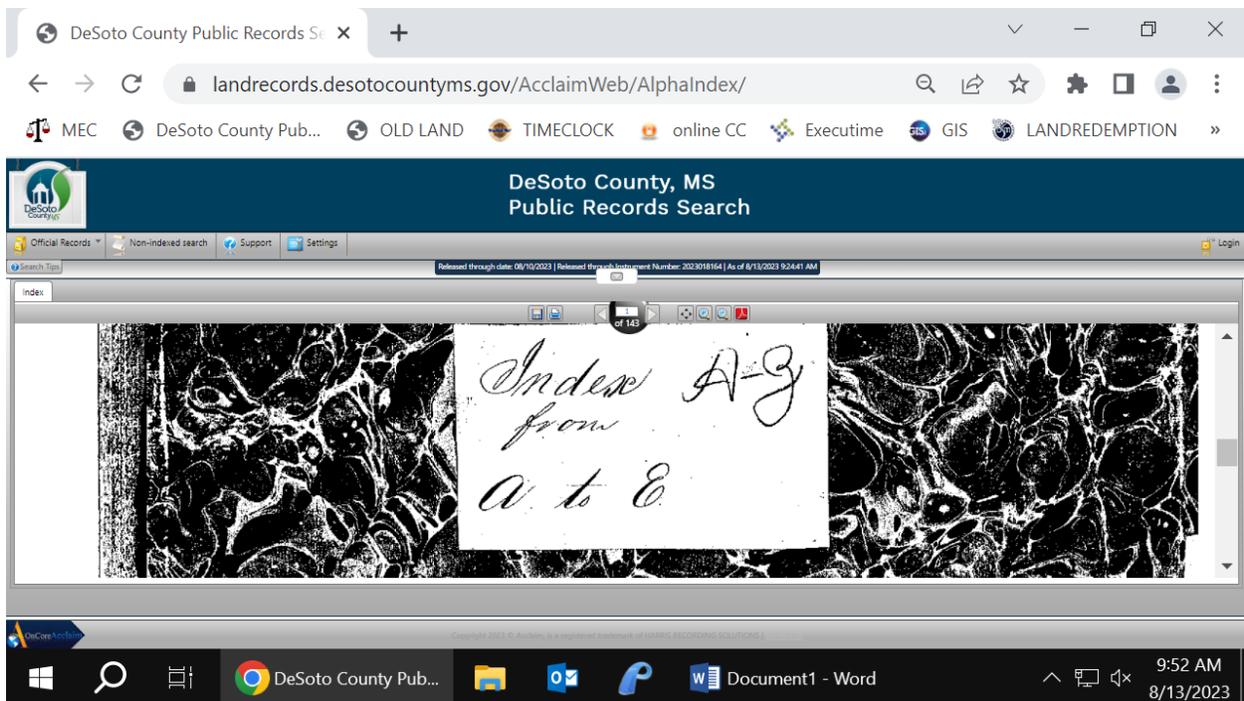

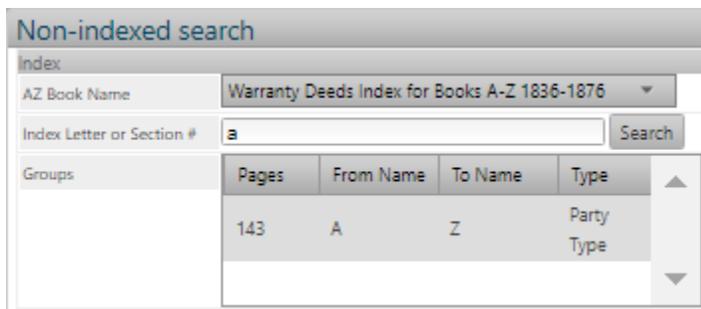

When you Click Non-Indexed, click the "I accept the conditions" box.

In the AZ Book Name there is a list of books that are available for you to view.

The Warranty Deed Index for Books A-Z 1836-1876 is not broken down by letter. Choose the book first, then enter any letter in the Index Letter field and click the Search button.

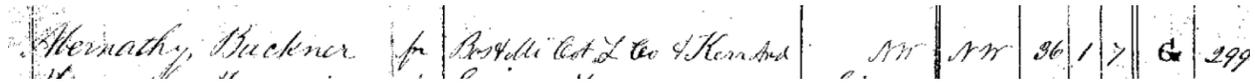

This book displays as the entire 143 pages. You will need to scroll through the pages using the buttons located at the top of the screen. You can also enter a page number to move faster through the page

numbers. For example if you know you are looking for a W name, you could enter 134 instead of using the arrows. Note: Letter N starts on page 98.

It is helpful to have another browser in the land records website open.

<https://landrecords.desotocountymms.gov/acclaimweb> Click the Book/Page tab.

Start in the non-indexed search screen. Find the record and look to the far right columns for the book and page reference.

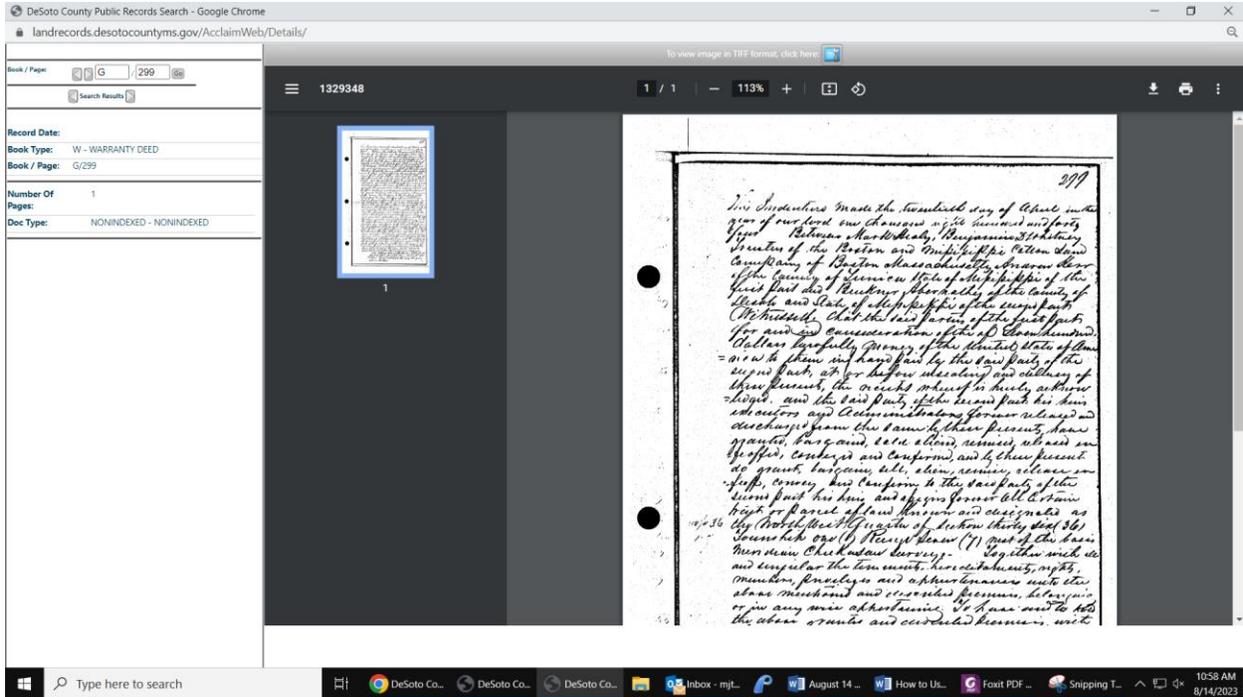

In the above example, the book is G and the page is 299.

Go to the other land records book and page search window and enter book G page 299 and search that entry.

A screenshot of a web browser displaying the DeSoto County, MS Public Records Search website. The browser address bar shows the URL 'landrecords.desotocountymms.gov/acclaimweb/search/SearchTypeBookPage'. The website header includes the DeSoto County logo and the text 'DeSoto County, MS Public Records Search'. Below the header, there is a search form titled 'Book / Page'. The form has fields for 'Book' (containing 'G') and 'Page' (containing '299'). There are also checkboxes for 'Docket Type' (set to 'All'), 'Show All Names' (checked), and 'Show All Legals' (unchecked). Below the search form, there is a table with the following columns: Row, Record Date, Doc Type, Book Type, Book/Page, Grantor, Grantee, and Legal. The table contains one row with the following data: Row 1, Record Date, Doc Type: NONINDEXED, Book Type: W, Book/Page: G / 299. The browser's taskbar at the bottom shows the Windows logo, a search bar, and several open applications including DeSoto Co., Outlook, and various utility programs. The system clock in the bottom right corner shows the date and time as 10:58 AM on 8/14/2023.

The search results will display a single page. Click the entry to display the scanned entry. If the scan does not display the proper page, go back and change the page number appropriately until to see the page number of the record you are looking for. The reason this happens is that the books are scanned as single pages and sometimes, the books have blank pages or duplicate pages and these pages have not yet been indexed.

Some documents are more than one page, if you need to look at the next page, enter the next sequential page number in the page number field on the left side of the screen and click the Go button to display the image. In these older books, the documents were only separated by the clerk's signature, so you will need to look for a separation line or clerk's seal to know where the end of the document is or where the next document begins.

In another example, if you were searching the Warranty Deed
